A Wasp has invaded our beehive.  
Please help us trap it, so it can't hurt our innocent  
bees. First, get to know the honeycomb.

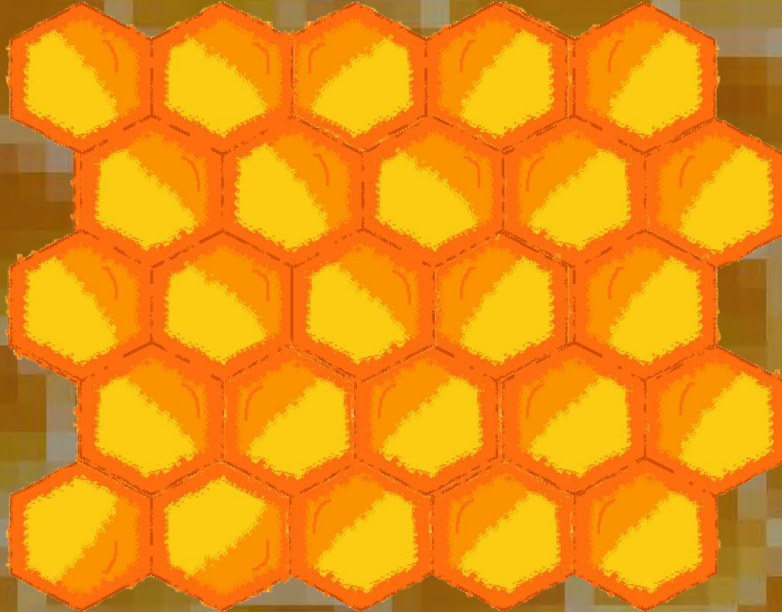

# LEVEL 1

**Queen Bee:**

Can you tell me how many  
cells the honeycomb has?

**Your task:**

You are given a paragraph  
of characters. An 'O'  
represents a hexagonal cell.  
**Count the number of cells.**

	Input	Output
Format	honeycomb	cellCount
Types	honeycomb (StringList): paragraph of characters representing a honeycomb	cellCount (int): the number of cells in the honeycomb
Example	<pre> 0-0-0-0-0- -0-0-0-0-0 0-0-0-0-0- -0-0-0-0-0 0-0-0-0-0- </pre>	<p>25</p> <p><i>Hint: Within a file, every row will have the same number of cells, but they are staggered.</i></p>
